Martin Luther-Eric Metaxas 2017 Explores the life of Martin Luther, delving into his life and works, as well as how his ideas had a profound impact on later conceptions of faith, virtue, and freedom.

College Essay Essentials-Ethan Sawyer 2016-07-01 Writing an amazing college admission essay is easier than you think! So you're a high school senior given the task of writing a 650-word personal statement for your college application. Do you tell the story of your life, or a story from your life? Do you choose a single moment? If so, which one? The options seem endless. Lucky for you, they're not. College counselor Ethan Sawyer (aka The College Essay Guy) will show you that there are only four (really, four!) types of college admission essays. And all you have to do to figure out which type is best for you is answer two simple questions: 1. Have you experienced significant challenges in your life? 2. Do you know what you want to be or do in the future? With these questions providing the building blocks for your essay, Sawyer guides you through the rest of the process, from choosing a structure to revising your essay, and answers the big questions that have probably been keeping you up at night: How do I brag in a way that doesn't sound like bragging? and How do I make my essay, like, deep? Packed with tips, tricks, exercises, and sample essays from real students who got into their dream schools, College Essay Essentials is the only college essay guide to make this complicated process logical, simple, and (dare we say it?) a little bit fun.

MLA Handbook for Writers of Research Papers- 2009-01-01 Provides guidelines and examples for handling research, outlining, spelling, punctuation, formatting, and documentation.

Major Research Topics in Combustion-M.Y. Hussaini 2011-09-30 The Institute for Computer Applications in Science and Engineering (ICASE) and NASA Langley Research Center (LaRC) brought together on October 2-4, 1989 experts in the various areas of combustion with a view to expose them to some combustion
problems of technological interest to LaRC and possibly foster interaction with the academic community in these research areas. The topics chosen for this purpose were flame structure, flame stability, flame holding/extinction, chemical kinetics, turbulence-kinetics interaction, transition to detonation, and reacting free shear layers. The lead paper set the stage by discussing the status and issues of supersonic combustion relevant to scramjet engine. Then the experts were called upon i) to review the current status of knowledge in the aforementioned research areas, ii) to focus on how this knowledge can be extended and applied to high-speed combustion, and iii) to suggest future directions of research in these areas. Each topic was then dealt with in a position paper followed by formal discussion papers and a general discussion involving the participants. The position papers discussed the state-of-the-art with an emphasis on key issues that needed to be resolved in the near future. The discussion papers critically examined these issues and filled in any lacunae therein. The edited versions of the general discussions in the form of questions from the audience and answers from the speakers are included whenever possible to give the reader the flavor of the lively interactions that took place.

A Primary Source Investigation of Reconstruction-Xina M. Uhl 2018-12-15 The era of Reconstruction followed the long, bloody Civil War, and became one of the most important in the nation's history. It set guidelines for race relations and the federal government's involvement in them. From black codes to voting rights for black men, Reconstruction was an active, but contentious period. Documents such as amendments to the Constitution and speeches from the nation's leaders are examined along with text that provides the necessary context to fully understand the volatile issues debated. This fully illustrated volume highlights the people and their works with a clear and authoritative voice.

The Everything New Teacher Book-Melissa Kelly 2010-03-18 Being a great teacher is more than lesson plans and seating charts. In this revised and expanded new edition of the classic bestseller, you learn what it takes to be the very best educator you can be, starting from day one in your new classroom! Filled with real-world life lessons from experienced teachers as well as practical tips and techniques, you'll gain the skill and confidence you need to create a successful learning environment for you and your students, including how to:
Organize a classroom Create engaging lesson plans Set ground rules and use proper behavior management Deal with prejudice, controversy, and violence Work with colleagues and navigate the chain of command Incorporate mandatory test preparation within the curriculum Implement the latest educational theories

In this book, veteran teacher Melissa Kelly provides you with the confidence you'll need to step into class and teach right from the start.

501 Writing Prompts-LearningExpress (Organization) 2018 "This eBook features 501 sample writing prompts that are designed to help you improve your writing and gain the necessary writing skills needed to ace essay exams. Build your essay-writing confidence fast with 501 Writing Prompts!"

Pleasure and the Good Life-Fred Feldman 2004-03-25 Since ancient times, hedonism has been one of the most attractive and controversial theories. In this text, the author presents a careful, modern formulation of hedonism, defending the theory against some of the most important objections.

Contemporary Research Topics in Nuclear Physics-Da-Hsuan Feng 2012-03-22 This volume contains the proceedings of a workshop held at Drexel University from September 1 to September 3, 1980, under the joint auspices of Drexel University, The University of Tennessee and Vanderbilt University. The workshop dealt with subjects of topical importance to the nuclear physics community: high spin phenomena, heavy ion reactions, transfer reactions, microscopic theories of nuclear structure and the interacting boson model, and miscellaneous topics. This proceedings contains all of the invited papers plus short manuscripts expanding on the materials of the invited papers. A total of about 85 participants came to the workshop. The format of the conference was kept informal on purpose, so as to facilitate the discussions. Unfortunately, these discussions, at times intense, could not be included in this volume due to the lack of secretarial help during the meeting. A great deal of current information was exchanged during the conference. However, the full impact of a conference can only be realized when the proceedings have been published and read by participants as well as other colleagues in this field of physics who were not in attendance. We sincerely hope that these proceedings will be useful in this regard.
Sir Gawain and the Green Knight (A New Verse Translation)-Simon Armitage 2008-11-17 A poetic translation of the classic Arthurian story is an edition in alliterative language and rhyme of the epic confrontation between a young Round Table hero and a green-clad stranger who compels him to meet his destiny at the Green Chapel. Reprint. 20,000 first printing.

A Quick List of Research Paper Topics and How to Start Your Research Paper-C. G. Brewer 2016-06-06 You have found the book to help you survive your whole high school and college years! Have you ever had a essay paper due and just had nothing...no ideas, nowhere to begin, nowhere to start...just staring at a blank screen or piece of paper? This book is here to help you find a topic to write on and even before that, show you the steps you need to take so you don't waste your time before you even begin starting your research and writing your paper. You will find the following categories with tons of topics in each: -Animal, Energy, and Environment -Business -Crime and Law -Drug and Drug Abuse -Education -Family and Children Issues -Government and Political Issues -Health -Media and Communications -Psychology -Religion -Science and Technology -Social Issues -Terrorism -Women and Gender -World Issues Don't worry if you don't see your specific category, because it could be a topic. Even if it isn't, these topics are great starting points to add another topic to one you currently have and/or are maybe struggling with. It could also give you ideas on where to take a topic if you already have one chosen. Usually combining two topics can lead to a more in-depth and focused research paper, but it really depends on what your assignment asks for. In addition there are over 30 questions to help focus your research, find your supporting points, and help to begin your paper and write your thesis. No topic and no supporting points equal no thesis, no research paper and the clock is tick tick ticking. There are also quick links within the e-book to help you navigate and jump around within the categories with ease and convenience, if you decide you want to change topics. This book will be a great addition to help any student who needs help finding a research topic and starting their paper!

How to Read Journal Articles in the Social Sciences—Phillip C. Shon 2015-07-20 Lecturers, request your electronic inspection copy here. This superb guide teaches you how to read critically. Its no-nonsense, practical approach uses a specially developed reading code to help you read articles for your research project; this simple code enables you to decipher journal articles structurally, mechanically and grammatically. Refreshingly free of jargon and written with you in mind, it’s packed full of interdisciplinary advice that helps you to decode and critique academic writing. The author’s fuss free approach will improve your performance, boost your confidence and help you to: Read and better understand content. Take relevant effective notes. Manage large amounts of information in an easily identifiable and retrievable format. Write persuasively using formal academic language and style. New to this edition: Additional examples across a range of subjects, including education, health and sociology as well as criminology. Refined terminology for students in the UK, as
Good Repaper Topic Ideas

well as around the world More examples dealing specifically with journal articles. Clear, focused and practical this handy guide is a great resource for helping you sharpen your use of journal articles and improve your academic writing skills. ‘I have used the book over the last five years with my students with great success. The book has helped students to develop their critical thinking, reading and writing skills and when it comes to writing a dissertation they have used the code sheet in their own writing.’ - Pete Allison, Head of the Graduate School of Education, University of Edinburgh SAGE Study Skills are essential study guides for students of all levels. From how to write great essays and succeeding at university, to writing your undergraduate dissertation and doing postgraduate research, SAGE Study Skills help you get the best from your time at university. Visit the SAGE Study Skills hub for tips, resources and videos on study success!

How to Write a Good Scientific Paper-CHRIS A. MACK 2018 Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

Ferri’s Clinical Advisor 2020 E-Book-Fred F. Ferri 2019-06-01 Significantly updated with the latest developments in diagnosis and treatment recommendations, Ferri’s Clinical Advisor 2020 features the popular "5 books in 1" format to organize vast amounts of information in a clinically relevant, user-friendly manner. This efficient, intuitive format provides quick access to answers on 1,000 common medical conditions, including diseases and disorders, differential diagnoses, and laboratory tests - all reviewed by experts in key clinical fields. Updated algorithms, along with hundreds of new figures, tables, and boxes, ensure that you stay current with today’s medical practice. Contains significant updates throughout, covering all aspects of current diagnosis and treatment. Features 27 all-new topics including chronic traumatic encephalopathy, medical
marijuana, acute respiratory failure, gallbladder carcinoma, shift work disorder, radial tunnel syndrome, fertility preservation in women, fallopian tube cancer, primary chest wall cancer, large-bowel obstruction, inguinal hernia, and bundle branch block, among others. Includes a new appendix covering Physician Quality Reporting System (PQRS) Measures. Provides current ICD-10 insurance billing codes to help expedite insurance reimbursements. Patient Teaching Guides for many of the diseases and disorders are included, most available in both English and Spanish versions, which can be downloaded and printed for patients.

Perspectives on Argument-Nancy V. Wood 2016-03-01 This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearson's MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearson's MyLab & Mastering products. Packages Access codes for Pearson's MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. --

The Literature Review-Diana Ridley 2012-07-31 This Second Edition of Diana Ridley’s bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance
Paragraph Development-Martin L. Arnaudet - Paragraph Development helps students edit their own writing for clarity and accuracy and offers a three-phase strategy for building writing skills through planning, writing, and revising. The approach in each chapter is direct and functional: a model is provided and graphically explained, then students use the model to write their own paragraphs. Offers controlled information-transfer exercises, a choice of writing topics, and peer consultation and writing-evaluation methods.

Freakonomics - Steven D. Levitt - Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life—from cheating and crime to parenting and sports—and reaches conclusions that turn conventional wisdom on its head. Freakonomics is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives—how people get what they want or need, especially when other people want or need the same thing.

The High School Student's Guide to Writing a Great Research Paper - Erika Eby - Presents a guide to writing a research paper, covering such topics as finding sources, taking research notes, creating an outline, writing the first draft, and completing the final version.

Diagnostic and Statistical Manual of Mental Disorders (DSM-5®) - This new edition of Diagnostic and Statistical Manual of Mental Disorders (DSM-5®), used by clinicians and researchers to diagnose and classify mental disorders, is the product of more than 10 years of effort by hundreds of international experts in all aspects of mental health. Their dedication and hard work have yielded
an authoritative volume that defines and classifies mental disorders in order to improve diagnoses, treatment, and research. The criteria are concise and explicit, intended to facilitate an objective assessment of symptom presentations in a variety of clinical settings -- inpatient, outpatient, partial hospital, consultation-liaison, clinical, private practice, and primary care. New features and enhancements make DSM-5® easier to use across all settings: The chapter organization reflects a lifespan approach, with disorders typically diagnosed in childhood (such as neurodevelopmental disorders) at the beginning of the manual, and those more typical of older adults (such as neurocognitive disorders) placed at the end. Also included are age-related factors specific to diagnosis. The latest findings in neuroimaging and genetics have been integrated into each disorder along with gender and cultural considerations. The revised organizational structure recognizes symptoms that span multiple diagnostic categories, providing new clinical insight in diagnosis. Specific criteria have been streamlined, consolidated, or clarified to be consistent with clinical practice (including the consolidation of autism disorder, Asperger's syndrome, and pervasive developmental disorder into autism spectrum disorder; the streamlined classification of bipolar and depressive disorders; the restructuring of substance use disorders for consistency and clarity; and the enhanced specificity for major and mild neurocognitive disorders). Dimensional assessments for research and validation of clinical results have been provided. Both ICD-9-CM and ICD-10-CM codes are included for each disorder, and the organizational structure is consistent with the new ICD-11 in development. The Diagnostic and Statistical Manual of Mental Disorders, Fifth Edition, is the most comprehensive, current, and critical resource for clinical practice available to today's mental health clinicians and researchers of all orientations. The information contained in the manual is also valuable to other physicians and health professionals, including psychologists, counselors, nurses, and occupational and rehabilitation therapists, as well as social workers and forensic and legal specialists.

Agriculture—John N. Koch 1992 Housed in Mo's office.

The Old Swimmin'-hole—James Whitcomb Riley 1895
The Lucifer Effect-Philip Zimbardo 2007-03-27 The definitive firsthand account of the groundbreaking research of Philip Zimbardo—the basis for the award-winning film The Stanford Prison Experiment Renowned social psychologist and creator of the Stanford Prison Experiment Philip Zimbardo explores the mechanisms that make good people do bad things, how moral people can be seduced into acting immorally, and what this says about the line separating good from evil. The Lucifer Effect explains how—and the myriad reasons why—we are all susceptible to the lure of “the dark side.” Drawing on examples from history as well as his own trailblazing research, Zimbardo details how situational forces and group dynamics can work in concert to make monsters out of decent men and women. Here, for the first time and in detail, Zimbardo tells the full story of the Stanford Prison Experiment, the landmark study in which a group of college-student volunteers was randomly divided into “guards” and “inmates” and then placed in a mock prison environment. Within a week the study was abandoned, as ordinary college students were transformed into either brutal, sadistic guards or emotionally broken prisoners. By illuminating the psychological causes behind such disturbing metamorphoses, Zimbardo enables us to better understand a variety of harrowing phenomena, from corporate malfeasance to organized genocide to how once upstanding American soldiers came to abuse and torture Iraqi detainees in Abu Ghraib. He replaces the long-held notion of the “bad apple” with that of the “bad barrel”—the idea that the social setting and the system contaminate the individual, rather than the other way around. This is a book that dares to hold a mirror up to mankind, showing us that we might not be who we think we are. While forcing us to reexamine what we are capable of doing when caught up in the crucible of behavioral dynamics, though, Zimbardo also offers hope. We are capable of resisting evil, he argues, and can even teach ourselves to act heroically. Like Hannah Arendt’s Eichmann in Jerusalem and Steven Pinker’s The Blank Slate, The Lucifer Effect is a shocking, engrossing study that will change the way we view human behavior. Praise for The Lucifer Effect “The Lucifer Effect will change forever the way you think about why we behave the way we do—and, in particular, about the human potential for evil. This is a disturbing book, but one that has never been more necessary.”—Malcolm Gladwell “An important book . . . All politicians and social commentators . . .
should read this.”—The Times (London) “Powerful . . . an extraordinarily valuable addition to the literature of the psychology of violence or ‘evil.’”—The American Prospect “Penetrating . . . Combining a dense but readable and often engrossing exposition of social psychology research with an impassioned moral seriousness, Zimbardo challenges readers to look beyond glib denunciations of evil-doers and ponder our collective responsibility for the world’s ills.”—Publishers Weekly “A sprawling discussion . . . Zimbardo couples a thorough narrative of the Stanford Prison Experiment with an analysis of the social dynamics of the Abu Ghraib prison in Iraq.”—Booklist “Zimbardo bottled evil in a laboratory. The lessons he learned show us our dark nature but also fill us with hope if we heed their counsel. The Lucifer Effect reads like a novel.”—Anthony Pratkanis, Ph.D., professor emeritus of psychology, University of California

Hot Topics in Burn Injuries-Selda Pelin Kartal 2018-05-23 The aim of this book is to give readers a broad review of burn injuries, which may affect people from birth to death and can lead to high morbidity and mortality. The book consists of four sections and seven chapters. The first section consists of the introductory review chapter, which overviews the burn injuries. The second section includes chapter "Burn Etiology and Pathogenesis," which focuses on burn injuries and clinical findings. The third section consists of chapter "Controlling Inflammation in Burn Injury" and is devoted to the role of inflammatory response, which is fundamental to the healing process, while a prolonged inflammation may lead to scarring and fibrosis. The fourth section consists of four chapters as follows: "Therapeutic Effects of Conservative Treatments on Burn Scars," "Herbal Therapy for Burns and Burn Scars," "Platelet-Rich Plasma in Burn Treatment," and "Surgical Treatment of Burn Scars." The book is easy to read and includes hot topics on burn injury to enhance the reader's understanding and knowledge.

Futile Pleasures-Corey McEleney 2017-01-02 Honorable Mention, 2018 MLA Prize for a First Book Against the defensive backdrop of countless apologetic justifications for the value of literature and the humanities, Futile Pleasures reframes the current conversation by returning to the literary culture of early modern England, a culture whose defensive posture toward literature rivals and shapes our own. During the Renaissance, poets
justified the value of their work on the basis of the notion that the purpose of poetry is to please and instruct, that it must be both delightful and useful. At the same time, many of these writers faced the possibility that the pleasures of literature may be in conflict with the demand to be useful and valuable. Analyzing the rhetoric of pleasure and the pleasure of rhetoric in texts by William Shakespeare, Roger Ascham, Thomas Nashe, Edmund Spenser, and John Milton, McEleney explores the ambivalence these writers display toward literature’s potential for useless, frivolous vanity. Tracing that ambivalence forward to the modern era, this book also shows how contemporary critics have recapitulated Renaissance humanist ideals about aesthetic value. Against a longstanding tradition that defensively advocates for the redemptive utility of literature, Futile Pleasures both theorizes and performs the queer pleasures of futility. Without ever losing sight of the costs of those pleasures, McEleney argues that playing with futility may be one way of moving beyond the impasses that modern humanists, like their early modern counterparts, have always faced.

How to Write a Great Research Paper—Book Builders 2004-08-11 Presents instructions and tips on ways to write a successful research paper, covering such topics as finding a topic, research, taking notes, creating an outline, writing a first draft, and revising and editing.

Case Study Research—John Gerring 2006-12-11 Case Study Research: Principles and Practices aims to provide a general understanding of the case study method as well as specific tools for its successful implementation. These tools can be utilized in all fields where the case study method is prominent, including business, anthropology, communications, economics, education, medicine, political science, social work, and sociology. Topics include the definition of a 'case study,' the strengths and weaknesses of this distinctive method, strategies for choosing cases, an experimental template for understanding research design, and the role of singular observations in case study research. It is argued that a diversity of approaches - experimental, observational, qualitative, quantitative, ethnographic - may be successfully integrated into case study research. This book breaks down traditional boundaries between qualitative and quantitative, experimental and nonexperimental, positivist and interpretivist.
Environmental Law Research Paper Topic Ideas and Samples-Cameron D. MacLennan 2006
How To Be an Antiracist-Ibram X. Kendi 2019-08-15 **THE GLOBAL MILLION-COPY BESTSELLER**
NOT BEING RACIST IS NOT ENOUGH. WE HAVE TO BE ANTIRACIST. 'Transformative and revolutionary' ROBIN DIANGELO, author of White Fragility 'So vital' IJEOMA OLUO, author of So You Want to Talk About Race In this rousing and deeply empathetic book, Ibram X. Kendi, one of the world's most influential scholars of racism, shows that neutrality is not an option: until we become part of the solution, we can only be part of the problem. Using his extraordinary gifts as a teacher and story-teller, Kendi helps us recognise that everyone is, at times, complicit in racism whether they realise it or not, and by describing with moving humility his own journey from racism to antiracism, he shows us how instead to be a force for good. Along the way, Kendi punctures all the myths and taboos that so often cloud our understanding, from arguments about what race is and whether racial differences exist to the complications that arise when race intersects with ethnicity, class, gender and sexuality. In the process he demolishes the myth of the post-racial society and builds from the ground up a vital new understanding of racism - what it is, where it is hidden, how to identify it and what to do about it. 'The most courageous book to date on the problem of race' New York Times 'It feels like a light switch being flicked on' OWEN JONES
Creationism and Its Critics in Antiquity-David Sedley 2008-01-16 The world is configured in ways that seem systematically hospitable to life forms, especially the human race. Is this the outcome of divine planning or simply of the laws of physics? Ancient Greeks and Romans famously disagreed on whether the cosmos was the product of design or accident. In this book, David Sedley examines this question and illuminates new historical perspectives on the pantheon of thinkers who laid the foundations of Western philosophy and science. Versions of what we call the "creationist" option were widely favored by the major thinkers of classical antiquity, including Plato, whose ideas on the subject prepared the ground for Aristotle's celebrated teleology. But Aristotle aligned himself with the anti-creationist lobby, whose most militant members—the atomists—sought to show how a world just like ours would form inevitably by sheer accident, given only the infinity of space and
matter. This stimulating study explores seven major thinkers and philosophical movements enmeshed in the debate: Anaxagoras, Empedocles, Socrates, Plato, the atomists, Aristotle, and the Stoics.

Trifles-Susan Glaspell 1916
Writing-Kumon 2012-06-02

The Dark Room-R. K. Narayan 2012-07-25 R. K. Narayan (1906—2001) witnessed nearly a century of change in his native India and captured it in fiction of uncommon warmth and vibrancy. In The Dark Room, Narayan’s portrait of aggrieved domesticity, the docile and obedient Savitri, like many Malgudi women, is torn between submitting to her husband’s humiliations and trying to escape them. Written during British rule, this novel brings colonial India into intimate focus through the narrative gifts of this master of literary realism.

Informing the News-Thomas E. Patterson 2013-10-08 As the journalist Walter Lippmann noted nearly a century ago, democracy falters “if there is no steady supply of trustworthy and relevant news.” Today’s journalists are not providing it. Too often, reporters give equal weight to facts and biased opinion, stir up small controversies, and substitute infotainment for real news. Even when they get the facts rights, they often misjudge the context in which they belong. Information is the lifeblood of a healthy democracy. Public opinion and debate suffer when citizens are misinformed about current affairs, as is increasingly the case. Though the failures of today’s communication system cannot be blamed solely on the news media, they are part of the problem, and the best hope for something better. Patterson proposes “knowledge-based journalism” as a corrective. Unless journalists are more deeply informed about the subjects they cover, they will continue to misinterpret them and to be vulnerable to manipulation by their sources. In this book, derived from a multi-year initiative of the Carnegie Corporation and the Knight Foundation, Patterson calls for nothing less than a major overhaul of journalism practice and education. The book speaks not only to journalists but to all who are concerned about the integrity of the information on which America’s democracy depends.

Linguistic Ethnography-Fiona Copland 2016-04-29 The collection demonstrates the ways in which established traditions and scholars have come together under the umbrella of linguistic ethnography to explore important
questions about how language and communication are used in a range of settings and contexts, and with what effect.

Ebola-Paul Richards 2016-09-15 Shortlisted for the Fage and Oliver Prize 2018 From December 2013, the largest Ebola outbreak in history swept across West Africa, claiming thousands of lives in Liberia, Sierra Leone and Guinea. By the middle of 2014, the international community was gripped by hysteria. Experts grimly predicted that millions would be infected within months, and a huge international control effort was mounted to contain the virus. Yet paradoxically, by this point the disease was already going into decline in Africa itself. So why did outside observers get it so wrong? Paul Richards draws on his extensive first-hand experience in Sierra Leone to argue that the international community's panicky response failed to take account of local expertise and common sense. Crucially, Richards shows that the humanitarian response to the disease was most effective in those areas where it supported these initiatives and that it hampered recovery when it ignored or disregarded local knowledge.

We Should All be Feminists-Chimamanda Ngozi Adichie 2015 Offers an updated definition of feminism for the twenty-first century, one rooted in inclusion and awareness.
