Brent Dees and L. David Dees 2009-05-09 The Lacrimal System-The Complete Guide to the Tear Film 2001-11-15 The Lacrimal System-The Complete Guide to the Tear Film is a succinct, short guide to the lacrimal system. The book is divided into seven chapters. The first chapter describes the anatomy and physiology of the lacrimal system. The remaining chapters cover tear film dynamics, pathophysiology of ocular surface disease, tear production, tear film stability, lacrimal drainage, and lacrimal surgery.

Parts can be used in conjunction with other textbooks, enabling instructors to create their own teaching materials. Instructors are free to sequence the material in any order, and to use as much or as little as they wish, so that the Lacrimal System-The Complete Guide to the Tear Film can be used as a standalone textbook, as a supplement, or even as a reference book. The book is intended for students and patients interested in learning about the lacrimal system.

Samantha Fowler 2018-01-07 Concepts of Biology is designed for the single-semester introduction to biology course. As such, this course represents an important opportunity for students to develop the skills and critical thinking abilities that will allow them to navigate a world of increasing complexity. The book is written to maximize student interest and engagement, whether students are majoring in the sciences or taking biology as a general education course.

Anatomical and Functional Considerations of the Nasal Septum and Sinuses-Edwin S. Klineberg 2015-01-07 The anatomical nasal septum is an intricate anatomical structure with a wide variety of shapes, sizes, and functions. The role of the nasal septum is to support the nasal cavity and play a role in the function of the nose. The nasal septum is composed of bone, cartilage, and soft tissue. The nasal septum is important in the regulation of nasal airflow and the maintenance of nasal cavity ventilation. The nasal septum is also important in the regulation of nasal congestion and the maintenance of nasal cavity ventilation.
