Beyond Pug's Tour-C. C. Barfoot 1997 At a time when the world, Europe especially, is once more threatened by murderous conflicts between groups of people claiming ethnic and national identity as a basis for sovereignty over specific territories, it is timely to consider the part that literature has played and is playing in the creation of ethnic and national stereotypes. What role do such stereotypes have in literature? How are they created? From what materials are they constructed? What purpose do ethnic and national stereotypes serve? Can it ever be a useful one? Are they avoidable? Can we live without them? What can be done about the deleterious effects they may be thought to produce? Stereotyping is worldwide -- is there a tribe, race and nation in existence which escapes being stereotyped by its neighbours? In what sense are these stereotypes accurate? How are these stereotypes reflected in and reinforced by literature? Should and can literature do anything about them? In Beyond Pug's Tour: National and Ethnic Stereotyping in Theory and Literary Practice, literary scholars, as well as academics engaged in sociological and psychological research, consider these and other questions by examining the work of specific authors and the circumstances in which stereotyping plays such a crucial part.

Oriental Networks-Bärbel Czennia 2020-12-18 Oriental Networks explores forms of interconnectedness between Western and Eastern hemispheres during the long eighteenth century, a period of improving transportation technology, expansion of intercultural contacts, and the emergence of a global economy. In eight case studies and a substantial introduction, the volume examines relationships between individuals and institutions, precursors to modern networks that engaged in forms of intercultural exchange. Addressing the exchange of cultural commodities (plants, animals, and artifacts), cultural practices and ideas, the roles of ambassadors and interlopers, and the literary and artistic representation of networks, networkers, and networking, contributors discuss the effects on people previously separated by vast geographical and cultural distance. Rather than idealizing networks as inherently superior to other forms of organization, Oriental Networks also considers Enlightenment expressions of resistance to networking that inform modern skepticism toward the concept of the global network and its politics. In doing so the volume contributes to the increasingly global understanding of culture and communication. Published by Bucknell University Press. Distributed worldwide by Rutgers University Press.
