Rockwood Fractures Package (Int Ed)-Paul Tornetta 2014-07-01 Go for the gold standard: the definitive, bestselling reference on adult and pediatric fractures, Rockwood, Green, and Wilkins' Fractures is now in its 8th edition. Written by the top orthopaedic surgeons from around the world, the three revised and updated volumes offer full coverage of all fracture types in both adults and children, presenting the experts' choices on operative techniques and management. Volumes I and II cover adults' fractures; Volume III covers children's. Features: NEW Expanded coverage of pain medicine and casting in Volume III (Children) NEW Chapters in Volumes I and II (Adults) on: Management of the Geriatric or Elderly Patient; Management of Bone Defects; Psychological Aspect of Trauma NEW Time-saving outline template for easy quick-reference "Before the Case" checklists of all necessary equipment for each surgical procedure Author's Preferred Technique section includes algorithms explaining why the author chose that procedure Pearls and Pitfalls and preventive measures listed for all procedures Full-color operative photos, tables, x-rays, diagrams and more than 500 line drawings of surgical procedures

Brocklehurst's Textbook of Geriatric Medicine and Gerontology E-Book-Howard M. Fillit 2016-05-06 The leading reference in the field of geriatric care, Brocklehurst’s Textbook of Geriatric Medicine and Gerontology, 8th Edition, provides a contemporary, global perspective on topics of importance to today’s gerontologists, internal medicine physicians, and family doctors. An increased focus on frailty, along with coverage of key issues in gerontology, disease-specific geriatrics, and complex syndromes specific to the elderly, makes this 8th Edition the reference you’ll turn to in order to meet
the unique challenges posed by this growing patient population. Consistent discussions of clinical manifestations, diagnosis, prevention, treatment, and more make reference quick and easy. More than 250 figures, including algorithms, photographs, and tables, complement the text and help you find what you need on a given condition. Clinical relevance of the latest scientific findings helps you easily apply the material to everyday practice. A new chapter on frailty, plus an emphasis on frailty throughout the book, addresses the complex medical and social issues that affect care, and the specific knowledge and skills essential for meeting your patients’ complex needs. New content brings you up to date with information on gerontechnology, emergency and pre-hospital care, HIV and aging, intensive treatment of older adults, telemedicine, the built environment, and transcultural geriatrics. New editor Professor John Young brings a fresh perspective and unique expertise to this edition.

Somerset County-Jaclyn LaPlaca 2003 Somerset County, in the heart of Pennsylvania's Laurel Highlands, drew its first settlers from the earliest waves of western migrants. Coal miners later fueled the fires of Johnstown's, Pittsburgh's, and the nation's industry, while artists from around the world were drawn to the region's mountainous beauty. At mining's height, entire Sicilian communities moved here, along with hopeful settlers from Poland and Slovakia who also brought their heritage and pride.

Rockwood and Green's Fractures in Adults-Charles A. Rockwood 2010 In its thoroughly revised, updated Seventh Edition, Rockwood and Green's Fractures in Adults offers a complete print and multimedia package: the established "gold-standard" two-volume reference on fractures and access to an integrated content website. More than 80 of the world's foremost authorities provide comprehensive coverage of all bone and joint injuries, thoroughly discuss alternative methods for
treated each injury, and present their own preferred methods. This edition has 33 new contributors and new chapters on principles of nerve injury and complex regional pain syndrome; psychological aspects of trauma; gunshot and wartime injuries; principles of mangled extremity management; amputations; limb salvage reconstruction; principles of post-traumatic infections; principles of nonunions; and principles of malunions. A companion website contains the fully searchable text, an image bank, and videos of 25 surgical procedures.

Publications of LASL Research-Los Alamos Scientific Laboratory 1972 Psychological Perspectives in HIV Care-Michelle Croston 2020-07-29 The care paradigm for people with HIV has shifted from managing progressive illness with a poor prognosis to managing a chronic condition. Despite this improvement, people living with HIV continue to experience considerable stresses, so promoting their holistic wellbeing is a key aspect of long-term care. This book provides an accessible introduction for healthcare professionals who work with people living with HIV. It is designed to help readers understand how care in practice can be more person-centred and psychologically focused, whilst promoting compassion, health and wellbeing. Topics covered include self-awareness, attachment theories and communication as well as key aspects of providing care for people living with HIV, such as stigma in young adults, neurocognitive issues, the sexualized use of
drugs, managing neuropathic pain, and the needs of older adults living with HIV. Invaluable reading for health professionals working within multidisciplinary teams that provide care for people living with HIV, this book is also a core text for those studying in the area.

Introduction to Population Ecology-Larry L. Rockwood 2015-03-16 Introduction to Population Ecology, 2nd Edition is a comprehensive textbook covering all aspects of population ecology. It uses a wide variety of field and laboratory examples, botanical to zoological, from the tropics to the tundra, to illustrate the fundamental laws of population ecology. Controversies in population ecology are brought fully up to date in this edition, with many brand new and revised examples and data. Each chapter provides an overview of how population theory has developed, followed by descriptions of laboratory and field studies that have been inspired by the theory. Topics explored include single-species population growth and self-limitation, life histories, metapopulations and a wide
range of interspecific interactions including competition, mutualism, parasite-host, predator-prey and plant-herbivore. An additional final chapter, new for the second edition, considers multi-trophic and other complex interactions among species. Throughout the book, the mathematics involved is explained with a step-by-step approach, and graphs and other visual aids are used to present a clear illustration of how the models work. Such features make this an accessible introduction to population ecology; essential reading for undergraduate and graduate students taking courses in population ecology, applied ecology, conservation ecology, and conservation biology, including those with little mathematical experience.

Sustainable Development Goals for Society Vol. 2-Godwell Nhano
The progressive growth in the number of older adults worldwide has led to a modification of the current healthcare scenario and a parallel increase in the use of public resources. In this book, we propose a conceptual framework within which aging, frailty, and care are analyzed through the lens of complexity medicine. Therefore, we present a multidimensional perspective that takes into account biomedical, (neuro)psychological, and socio-ecological vulnerability. The theses presented are the result of an inductive approach, based on many years of experience in the field, which has made it possible to identify strategies for frailty recognition and effective responses even in complicated clinical settings. The book is intended to be a tool of concrete and easy consultation, rich in reflections and suggestions.

Encyclopedia of Biomedical Gerontology presents a wide range of topics, ranging from what happens in the body during aging, the reasons and mechanisms relating to those age-related changes, and their clinical, psychological and social modulators and determinants. The book covers the biological and medical aspects of gerontology within the general framework of the biological basis of assessing age, biological mechanisms of aging, age-related changes in biological systems, human age-related diseases, the biomedical practicality and impracticality of interventions, and finally, the ethics of intervention. Provides a 'one-stop' resource to information written by world-leading scholars in the field of biomedical gerontology.
